

It is a non-hormonal organic root biostimulant with a richness of 5000 ppm of rooting promoters, which increases the formation of rhizomes, lateral and adventitious roots. In addition, it contains carbohydrates and a high dissolution of perfectly selected L-amino acids, which are used by plants as an easily assimilated energy source, increasing the adsorption capacity of nutrients.

With **BP Koren[®]** plants grow stronger and protected from any damage or natural adversity that may affect them. Flowering will be more abundant, which will result in greater fruit production.

GUARANTEED COMPOSITION

Nitrogen (N)	2.5% (W/V)
Potassium (K ₂ O)	0.4 % (W/W)
Amino acids.....	8.3% (W/V)
Rooting promoters.....	5000 ppm

CROP	DOSAGE
Extensive	0.5 - 1.5 L/Ha (drip)
Intensive	0.5 - 1.75 L/Ha (drip)
Nursery	Mix 150 ml/m ³ of substrate (pre-sowing) Apply 10 ppm in the irrigation train (continuously) Foliar: 150 ml/1,000 m ² nursery (give irrigation to lower product)
Transplants	Immersion: 0.5 - 1 ml/L Drench: 150 ml of solution
Hydroponics	0.5 - 1.00 L/100 m ³ agua (in continuous) 0.5 - 1.00 L/Tank 1,000 L of 100 times concentrated mother solution
Immersion	0.5 - 1 ml/L

PHYSICAL-CHEMICAL CHARACTERISTICS

Appearance: *Dark brown liquid*
pH: <4,8
Density: <1.6 g/ml

Presentation:
1L, 5L, 20L, 1,000L
